NEWS RELEASE

Wardrop updated Resource Report on Nithi Mountain Moly Deposit

Leeward is pleased to announce the completion of the updated resource report by Tetra Tech Wardrop on the Nithi Mountain Molybdenum deposit located in central British Columbia near the Endako Mine. This report in its entirety will be posted on Leeward's website. This report includes the results of the most recent drilling on the Delta Prime Structure within the Delta Zone. This structure has been delineated for over a kilometre and remains open to further drilling. The QP for this release is James W. Davis, P.Geol., P.Geo., F.GAC

On behalf of the Board of Directors

R.J. (Jim) Millikan
Leeward Capital Corp.

The TSX Venture Exchange Inc. does not accept responsibility for the adequacy or accuracy of this release.

All statements, other than statements of historical fact, in this news release are forward-looking statements that involve various risks and uncertainties, including, without limitation, statements regarding the potential extent of mineralization and reserves, exploration results and future plans and objectives of Leeward Capital Corp. These risks and uncertainties include, but are not restricted to, the amount of geological data available, the uncertain reliability of drilling results and geophysical and geological data and the interpretation thereof and the need for adequate financing for future exploration and development efforts. There can be no assurance that such statements will prove to be accurate. Actual results and future events could differ materially from those anticipated in such statements. These and all subsequent written and oral forward-looking statements are based on the estimates and opinions of management on the dates they are made and are expressly qualified in their entirety by this notice.
